

June 6, 2026

The Honorable Elizabeth Warren
Ranking Member
Committee on Banking,
Housing, and Urban Affairs

Dear Senator Warren:

Thank you for reaching out about the Committee's June 11 hearing, "AI and the American Dream: Promoting Innovation, Affordability, and American Dominance."

I am unable to attend, but appreciate the Committee's focus on these important issues.

NVIDIA designed, built, and delivered the first AI supercomputer to American researchers over a decade ago. Since that time, we have been dedicated to keeping American researchers, academics, startups, and businesses at the forefront of AI-related technologies.

American leadership in AI technologies cannot be taken for granted, but we are confident in the future and believe in the American system. We are proud to help America's innovators enhance the lives of every American by creating skilled jobs, reindustrializing the country, and strengthening our economic and national security.

I would welcome the opportunity to host you, or any member of the Committee, at NVIDIA's headquarters in Santa Clara to discuss our technology, the American AI ecosystem and how we can support U.S. leadership.

Sincerely,

Jensen Huang
Founder and CEO
NVIDIA
